BULLETIN.  
♦ ♦ ♦ ♦ ♦  
Flushing, N. Y., May 11.—  
♦ Capt. Peter C. Hains, jr., was  
♦ found guilty of manslaughter in  
♦ the first degree by the jury,  
♦ which returned a verdict this af-  
♦ ternoon, after a deliberation of  
♦ four hours. The defendant was  
♦ remanded to the custody of the  
♦ sheriff.

Flushing, N. Y., May 11.—The jury  
at 12:05 p. m. was given the case of  
Captain Peter C. Hains, jr., charged  
with the shooting of William E. An-  
nis. Attorney McIntyre for the de-  
fense said he believed the jury would  
be out for twenty-four hours and  
would return without a verdict. He  
said he had information that two of  
the jurors were opposed to the de-  
fense of insanity, and would not vote  
for acquittal for that reason.

Question Faces Judge.  
Soon after the trial of Hains was  
called today, former District Attorney  
Gregg concluded his arguments. Then  
came the charge of Justice Garretson.  
In the event of Hains' acquittal on  
the grounds of insanity, of the charge  
that he shot and killed Annis at the  
Bayside Yacht club last August, the  
question of his present mental condi-  
tion arises. Should Judge Garretson  
share the belief of Attorney McIntyre  
of the defense that Hains is not in-  
sane, he may order the captain sent  
to an asylum pending a cure.

charged with the detention of trains

crushed steel in the oil cups of the  
journal bearings of a certain locomotive

Wool Values Tend Upward.  
Boston, May 11.—Local wool values  
still tend upward, keeping even with  
the advance in London and the west.  
Dealings in the Boston market were  
confined to this territory, but condi-  
tions in the west were closely follow-  
ed. Fairly heavy receipts of Nevada,  
Utah and Arizona wools have filled up  
the local bins which for weeks have  
been empty of old stock. New Wyom-  
ing held at 23¢25, while Utah was  
quoted at 19¢22. Consumers of pulled  
wool and foreign product are buy-  
ing freely.

## MISSING ARCHDUKE FOUND IN AMERICA

Chicago, May 11.—The Journal to-  
day devotes a front page to an elab-  
oration of the statement that it has  
discovered the "lost John Orth," oth-  
erwise Archduke Johann Salvator of  
Austria, prince of the house of Espe-  
sburg, who disappeared thirteen years  
ago, after marrying Ludmilla Stibel,  
an opera singer.

It is stated that Orth was discov-  
ered at Painesville, Ohio, following  
the occupation of a machinist for \$15  
a week. The reason for making his  
identity known is advancing age and  
a desire to be buried in Austria. It  
is said that his beautiful wife and two  
children were killed in the Mount  
Pelee disaster and since then Orth  
has been a wanderer.

Land in Enemy's Country.

by the people, but were allowed to  
leave after the payment of the cus-  
toms duties. The balloon and luggage,

cussed. Incorporation papers are

ing of the full sanatorium committee

## RECONSIDER RATES ON LEAD

MEMBERS OF FINANCE COMMIT-  
TEE WILL SUBMIT DIFFERENT  
SCALE OF DUTIES.

ALDRICH MAKES STATEMENT

BRISTOW ANNOUNCES HE WILL  
SPEAK ON MATTER WHEN  
IT IS REACHED.

TARIFF ON SULPHUR REDUCED

HOUSE PROVISION AMENDED AND  
CRUDE SULPHUR PLACED  
ON FREE LIST.

Washington, May 11.—When the  
tariff bill was taken up this morning,  
Aldrich stated that the committee on  
finance would submit a different  
scale of duties on zinc ore and the  
products of zinc, and asked that the  
schedule as well as the sections un-  
acted on, relating to lead products, be  
passed over for the present. The re-  
quest was granted. Bristow announc-  
ing that he would speak on the lead  
schedule when it was reached. On a  
motion of Aldrich the section relating  
to soap was amended, placing a 50  
per cent ad valorem on perfumed  
soap for revenue purposes. The  
house provision on sulphur was am-  
ended, placing crude sulphur on the  
free list and providing for a duty of  
\$4 a ton of refined sulphur, the pre-  
sent law and the house bill providing  
\$6 a ton. The schedule relating to  
mica was passed over by Aldrich,  
saying the committee desired to re-  
consider that paragraph.

When the schedule on chinaware  
and earthenware came up, Cummins  
of Iowa, suggested that two-thirds  
of the chinaware was imported, while  
80 per cent of the earthenware used  
was of domestic manufacture, and  
added that later he proposed to intro-  
duce an amendment to reduce the  
rate on earthenware.

Speaking on the rates on steel and  
earthenware, Bacon offered an am-  
endment reducing the rate from 60 to  
35 per cent ad valorem. This was de-  
feated. As a result, an understanding  
was reached, after a discussion of the  
parliamentary status of the bill that  
hereafter unless passed by agree-  
ment and no further opportunity to  
amend will be had until the bill  
reaches the parliamentary status of  
being before the senate.

where the aeroplanes planned for the  
government service will be completed.  
From Dayton they will go to Wash-

out under direction of government ex-  
perts. Following the completion of  
the work at Washington, they an-  
nounce they will return to Europe to  
fulfill contracts with private individ-  
uals. A large party of friends greet-  
ed the aeroplanists and accompanied  
them ashore.

Orville Wright said, in speaking of  
the practicability of the aeroplane,  
that they often carried two passen-  
gers and could have carried several  
more. He said he believed that the  
aeroplane would never be a passen-  
ger conveyance, but will be used as a  
carrier for a few persons. As to the  
war feature, he said he had been told  
by experts that an aeroplane is safe  
at a thousand feet in the air and as  
his machine can go much higher, he  
considered that point settled.

## FINE WATER SYSTEM IN VEGAS

COMPANY JUST COMPLETES  
FIFTY THOUSAND DOLLARS'  
WORTH OF IMPROVEMENTS.

NOW HAS TWO PIPE LINES

MORE THAN SUFFICIENT WATER  
CAN BE BROUGHT DOWN  
FROM RESERVOIRS.

PRESSURE WILL BE STRONG

CIRCULATION WILL BE MAIN-  
TAINED THROUGH ENTIRE  
SYSTEM.

The Agua Pura company has just  
completed improvements to its water  
system, costing about \$50,000. The  
improvements consist of the laying of  
6,500 feet of 16-inch iron pipe above  
the reservoir, and a separate line  
from the reservoir to East Las Ve-  
gas, down Eighth street, of 8-inch  
cast iron pipe. The distance from  
the reservoir to the system connec-  
tion at Bacon avenue, East Las Vegas,  
is 13,000 feet, and this is an entirely  
new line, independent of the original  
line, that lies on the boulevard.  
The system is now arranged so that  
the circulation is through the entire  
pipe work, but either line, will supply  
both Las Vegas and East Las Vegas,  
or either town can be supplied inde-  
pendent of the other.

During the latest sprinkling season,  
which are from 4 a. m. to 10 a. m. and  
4 p. m. to 10 p. m., there is a strong  
pressure in the pipes, and no lawn  
need suffer for lack of water.

Las Vegas is noted for its fine  
lawns, and the water company has  
put its system in such shape that a  
little care and time will insure even  
more beautiful homes.

F. H. Pierce, who has had the man-  
agement of the Agua Pura company  
for more than twenty years past, says  
"Las Vegas has the best water in the  
west, and since the improvements  
have been completed, has one of the  
finest water plants of any city or  
town in the whole broad country."

The water consumers are requested  
to observe irrigation hours, and to  
keep connections, hydrants, hose and  
all fixtures in proper repair.

## RHODES PLAYS GREAT GAME FOR ST. LOUIS

The St. Louis Cardinals beat the  
St. Louis Cubs yesterday by a score  
of five to two, with Charley Rhodes  
of this city, in the box for the victors.  
Of his playing, the Denver Post says:

"As it was, it required grand defen-  
sive work by those hustling Cardinals  
to enable them to hang onto what  
luck gave them; and if the Cubs had  
attacked with a little more brains  
they might have retrieved themselves  
in three different innings. The main  
reason they didn't was the fact that  
they were up against some pitcher—  
little Colossus Rhodes—who looked  
bigger than his bronze grandpaw. The  
little fellow had a teasing habit of  
pitching three wise ones, then shoot-  
ing three over in bewildering suc-  
cession.

"When things were at their worst  
and he couldn't save himself by pitch-  
ing, Rhodes did it by fielding, giving  
a good exhibition of defensive work.  
In all he grabbed seven drives that  
were aimed through the box, and  
three of them simply were interrup-  
ed base hits that might have turned  
the tide."
